

## Bringing Ideas to Life

View your container, turn it around and look inside—all from your computer screen. With **N.E.W. Plastics Corp.**, you have access to the latest in high-tech design. We'll provide virtual and physical models as we make your concept a reality.

- Physical modeling
- Rapid prototyping
- 3D modeling
- Virtual reality design review

### CAPABILITIES

We offer injection and extrusion blow molding.

#### Standard Quality Controls

- In-line leak testing
- Sampling
- Product tracking

#### Certifications

- American Institute of Baking (AIB)
- Wisconsin Department of Agriculture Certification for Single Service Dairy
- FDA Drug Master File (DMF)

### Sustainable Packaging

Major retailers are demanding packaging reductions. Consumer dollars are going to companies that demonstrate environmental care, promote a commitment to green manufacturing and meet the growing demand for environmentally responsible products.

<b>Reduced Packaging</b>	Get rid of your boxes. Rigid canisters and bottles are ready for shelf display.
<b>Recycled Packaging</b>	Package your product in up to 95% recycled material, as appropriate*.
<b>Recyclable Packaging</b>	Maximize recyclability with designs that meet most municipal recycling standards.
<b>Lower Plastic Use</b>	Cut material use by fine-tuning your existing container design.
<b>PVC-Free</b>	The production of PVC creates health risks, is toxic and is not easily recycled.

Ask us how to build sustainability into your packaging. **N.E.W. Plastics Corp.** has been at the forefront of sustainable plastics manufacturing since 1968 and does not produce products containing PVC or BPA.

*\*Your application may require prime resin.*
